LIGHT

MAIN ACTIVE INGREDIENTS

- **4% Lumiskin™:** powerful brightening and skin-conditioning agent that helps prevent hyperpigmentation and reduces the appearance of UV-induced dark spots. Enhances luminosity and contributes to a more even, radiant complexion.
- **SPF50 Mineral Filters (Zinc Oxide & Titanium Dioxide):** 100% natural and reef-safe filters that offer broad-spectrum UVA & UVB protection while being gentle on the skin. Free of chemical UV filters.
- **3% Niacinamide (Vitamin B3):** A multifunctional active that boosts hydration, reinforces the skin barrier, protects against pollution and blue light, and helps regulate excess sebum — ideal for combination and oily skin.

*In Vivo test with 20 volunteers applying a cream with Lumiskin twice a day for two months.

THE POWER OF 360° TREATMENT

While SPF50 mineral filters protect the surface of the skin from sun damage, its advanced depigmenting actives work deep within the epidermis to:

- ✓ reduce visible dark spots
- ✓ prevent the formation of new ones
- ✓ unify the skin tone
- ✓ boost natural radiance

Combined with the UNIC**WHITE** line and the green-light mode of the UNIC**LED 5.0 CENTURION KOREAN MASK**, UNIC**SUN+** becomes part of the only 360° anti-spot protocol on the market: protection, treatment, and intensive correction from morning to night.

HOW TO USE

- **Step 1:** Morning Application. Apply generously to the face, neck, and décolleté as the final step of your morning skincare routine.
- **Step 2:** Ensure Full Coverage. For optimal protection, use enough product to create an even, translucent layer. Gently massage until fully absorbed.
- **Step 3:** Reapply as Needed. Reapply frequently, especially after sweating, swimming and towel drying, when exposed to direct sunlight for extended periods

PRECAUTIONS

- **Avoid contact with eyes and mucous membranes.** Although its mineral filters are gentle, they may cause discomfort if they enter the eyes. In case of accidental contact, rinse immediately with plenty of water.
- **Do not apply to irritated, inflamed, or broken skin.** If the skin shows sensitivity, redness, or any alteration, allow it to recover before using the product to avoid increased irritation.
- **For external use only and keep out of reach of children.** This product is formulated for adult topical use. Do not ingest or use for purposes other than facial care.
- **Apply as the final step of your morning routine and reapply frequently.** To ensure the indicated SPF50 protection, apply a generous amount and reapply every 2-3 hours during sun exposure, as well as after swimming, sweating, or towel-drying.
- **Store in a cool, dry place away from direct light.** High temperatures or prolonged exposure to sunlight may affect the effectiveness of the mineral filters and active ingredients

Q&A

1. Is UNICSUN+ Dark Spot Control suitable for all skin types?

Yes. Its lightweight, translucent mineral formula is suitable for all skin types, including sensitive, combination, and oily skin.

2. Does it leave a white cast?

No. Although it contains 100% mineral filters (Zinc Oxide & Titanium Dioxide), the texture is translucent, with a soft, lightweight finish.

3. Can I use it during pregnancy or breastfeeding?

Yes. It does not contain ingredients contraindicated during pregnancy or breastfeeding.

4. Will it help reduce existing dark spots?

Absolutely. The formula contains 4% Lumiskin™, clinically tested to reduce the appearance of dark spots by up to 90%, while increasing brightness by 74% after consistent use.

5. Does it protect against blue light and pollution?

Yes. With 3% Niacinamide and mineral filters, it helps protect the skin from digital screen light and environmental pollutants.

6. Can I use makeup on top?

Yes. It absorbs quickly, leaves no residue, and provides a smooth, hydrated base ideal for makeup.

7. How often should I reapply it?

Reapply every 2-3 hours when exposed to the sun and always after sweating, swimming, or towel drying.

8. Is this product reef-safe?

Yes. It is formulated with 100% natural mineral filters and contains no chemical UV filters, making it reef-friendly.
